
Clear, Graphic & Optical Polycarbonate Films

LEXAN™ 8B35 offers great printability

SABIC'S LEXAN™ 8B35 HAS GREAT MAR RESISTANCE FOR APPLICATIONS REQUIRING DURABILITY...

SABIC Innovative Plastics™

POLYCARBONATE

LEXAN™ 8B35 is a velvet/matte transparent polycarbonate that can be used in many applications. Ir's velvet/matte finish reduces the chance of the film scratching during converting and handling, as well as, while the material is in use at its end application. The material can be screen printed using traditional solvent or water based inks. 8B35 can also be printed on with UV or infrared drying inks.

Features:

- High temperature resistance
- Excellent dimensional stability
- Good printability without pre-treatment
- Velvet/matte texture offers mar resistance
- Offered 3 - 20 mil
- Embossable
- Diecuttable
- Hydroformable

Applications:

- Backlit displays

LEXAN™ 8B35 can be converted at Tekra and supplied in either roll or sheet form. Call us today to receive a quote or free samples.
