

Satin Texture Polyester

Satin Texture Pleasing to the Eye and Touch!

For those applications needing a rougher, more perceptible textured finish, ProTek® Satin Texture Polyester is the hardcoated film of choice. It provides a very attractive surface to the polyester with all the benefits of a protective hardcoat. ProTek Satin Texture Polyester has the following benefits:

- ✓ Tactile, visually attractive textured finish
- ✓ First surface printability
- ✓ Excellent scratch & abrasion resistance
- ✓ High chemical resistance to common household & industrial chemicals
- ✓ Easily diecut and embossed
- ✓ Good optical properties
- ✓ Available on both standard printable polyester and UV ink receptive polyester

ProTek Satin Texture is available in 7 mil & 10 mil for printable polyester. It is also available in 7 mil for UV ink receptive polyester.

Typical Applications Include:

- Nameplates
- Faceplates
- Industrial Switches
- Product Markings
- General Membrane Touch Switches
- Exercise Equipment Overlays

**For a Look and Feel Second to None,
