TEKRA INTRODUCES 3M™ DUAL LOCK™ RECLOSABLE FASTENERS

New Berlin WI - Tekra Corporation, a 3M Preferred Converter, announces the addition of 3M™ Dual Lock™ Reclosable Fasteners to their extensive distribution line of 3M products.

3M™ Dual Lock™ Reclosable Fasteners are a fastening solution that can replace screws, bolts and rivets. The fasteners lock hundreds of mushroom shaped stems to form secure, yet removable, attachments between substrates. The fasteners give you more flexibility in your application designs. 3M™ Dual Lock™ Reclosable Fasteners allow you to adjust, realign or reattach pieces with ease while also improving the aesthetics of your finished product.

According to Julie Levins, Market Development Manager for Tekra, "3M™ Dual Lock™ Reclosable Fasteners are available with a variety of adhesive options, including with 3M™ VHB™ RP Tape technology." Application ideas include signs and graphics for trade show booths, point-of-purchase signs, decorative trim and many more.
