

ADHESIVES >

Providing Better Alternatives

ADHESIVES >

No brand is better recognized for adhesives technology and innovation than 3M. Through our long association with 3M, Tekra has developed extensive application knowledge, as well as sophisticated inventory and logistics systems that ensure fast delivery on a wide range of in-stock products. Plus, as a 3M Authorized Converter and Distributor, Tekra provides value-added product customization – including laminating, slitting and sheeting to precise specifications.

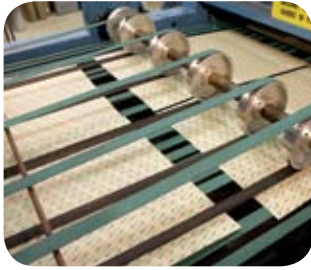

IN STOCK, READY FOR FAST DELIVERY >

Tekra maintains multi-location stocks of the most popular 3M products including adhesive transfer tapes, spacer materials, labels, and protective tapes. Production quantities of these materials are typically available for shipment within one to two days of order receipt. Sample rolls can be shipped same-day.

Tekra also offers, at no additional cost, stock pre-slit rolls. As an example, customers may order a single 24 inch roll of 3M™ Adhesive Transfer Tape 467MP without incurring an up-charge for buying less than the full master web width.

If you work in a just-in-time basis environment, Tekra will even structure special stocking programs to ensure prompt delivery of the materials you need, just when you need them.

PRODUCT CUSTOMIZATION AND LAMINATION >

Tekra specializes in custom slitting, sheeting and laminating 3M adhesives to meet exact customer needs. Our in-house laminating department will add or remove secondary liners, apply over-laminates, and add or remove masking – to name but a few services. Laminations may be applied to a variety of substrates available through Tekra. Or, through our toll-converting lamination services, Tekra will apply adhesives to customer-supplied materials.

We are set up to run roll-to-roll laminations in gauges from 0.001 to 0.060 inch. 40 inch diameter rolls, with widths ranging from 15 to 56 inches, are comfortably within our laminating capacity.

PRODUCTS: Masking, labels, transfer tapes, double coated tapes, over-laminates, spacers

GAUGES: 0.001" - 0.030"

WIDTH: 15" to 56", roll O.D. to 40"

SINGLE SOURCE SIMPLICITY AND SAVINGS >

Tekra is uniquely structured to be a one-stop shop for our customers. Our alliance partners provide us preferred access to a variety of materials used throughout your organization. Besides being an Authorized Converter and Distributor for 3M products, Tekra is the North American Authorized Distributor for polyester and PEN films manufactured by DuPont Teijin Films, and an Authorized Distributor for the polycarbonate films of SABIC Innovative Plastics.

We also manufacture our own line of products. Marnot™ and ProTek™ and Terrapin™ hardcoated substrates protect or enhance a film's finish or texture. Dura-Go®, DuraKote™ and ToneKote™ films have print-receptive coatings specifically for digital presses. When a customer requires a product with unique performance characteristics, Tekra will assist in developing film, coating and laminating solutions tailored to meet exacting requirements.

Tekra also offers a wide range of additional products including vinyls, styrenes, DuPont Tyvek®, and DuPont Microcircuit Materials conductive inks.

Through our product breadth, application knowledge and special capabilities, Tekra can save you time and money by consolidating your purchases under one roof.

AVAILABLE PRODUCTS >

Hardcoated polycarbonate and polyester films
Digital films for HP Indigo and toner based presses
Adhesives (3M)
Polyester films (DuPont Teijin Films)
Polycarbonate films (SABIC Innovative Plastics)
Rigid vinyl
Styrene
Label stock
Masking
Banner materials (Tyvek®)
Conductive inks (DuPont Microcircuit Materials)
Other plastic films available
Custom coatings for your application
