Dry Erase Hard Coated Polyester Film

Superior performance dry erase hard coated polyester films for high grade applications

One of the many unique coatings Tekra applies to polyester films is our dry erase coating. This gloss hard coated dry erase coating formulation allows polyester films to have exceptional writeability and eraseability with dry erase markers of a variety of colors. With the dry erase coating also being a hard coat, it renders the film to be chemical resistant to standard household cleaners and chemicals that tend to break down dry erase coatings functionality.

Tekra offers a 5 mil **clear** and **white** gloss dry erase polyester film. In addition, Tekra can create custom products by applying the dry erase coating to a range of polyesters from .00092" to .010" thick in either white or clear. Since Tekra coats master rolls up to 60" wide, Tekra can convert material to either sheets or slit rolls to meet your operation needs.

Tekra's Dry Erase Hard Coated Polyester Film erases easily without ghosting.

Features:

- Exceptional writeability tested with a variety of colors including black, blue, green and red.
- Inks easily erase without ghosting.
- Is chemical resistant to standard household cleaners and solvents.
- Dry erase coating is also a hard coat with a pencil hardness of H - 2H allowing for use in harsh indoor environments.
- Available in clear for overlamine applications and white for standard applications.

Typical Applications:

- Dry Erase Boards
- Large Format Dry Erase Graphics
- Promotional Dry Erase Graphics
- Overlaminates
