## 3M™ Quick Bonding Adhesive 360

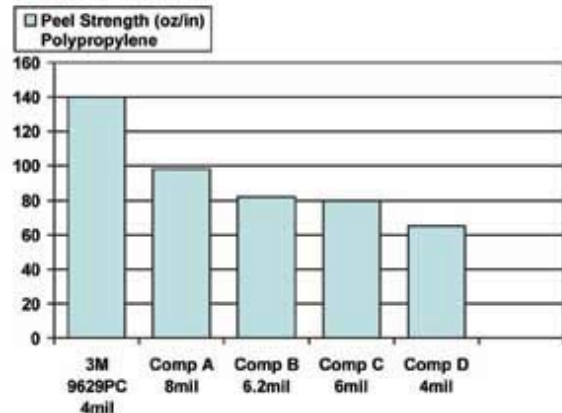

Ready to “Think Thin” in 2011? Tekra can help! Tekra actively stocks 3M™ Quick Bonding Adhesive 360 products. With a thin 2 mil or 5 mil transfer tape or thin 2 mil or 4 mil double-coated tape using 3M™ Quick Bonding Adhesive, shear and peel strengths are equal or greater than other thicker tapes.

And, if better aesthetics weren’t enough.....there’s more. 3M™ Quick Bonding Adhesive 360 products live up to their name. The tapes provide quick stick for fast, secure assembly over a range of high and low surface energy surfaces even providing strong bonds to tough to stick to surfaces like powder coated paints and nylon.

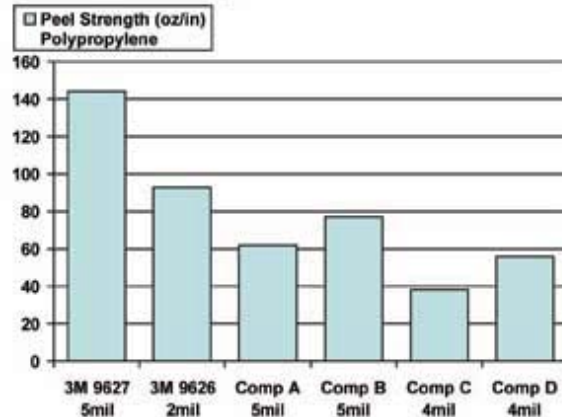

3M™ Quick Bonding Adhesive 360 products are also easy to convert. Adhesive oozing is minimized which helps cut down on adhesive “picking” issues during rewind, adhesive residue on cutting blades and adhesive confusion.

3M™ Quick Bonding Adhesive 360 products are available in both transfer tape and double coated forms from Tekra Corporation. Call us today for a sample and/or quotation.
