## LEXAN™ 8A13E Polycarbonate

SABIC has developed a high clarity film with features and benefits that will help save time and money throughout the production process. LEXAN™ 8A13E is a clear, graphic grade polycarbonate that has a polish/fine matte texture. The major advantage in using this film is that it has lower ink consumption than its counterparts. The 8A13E requires less passes of ink for full coverage, thus saving on ink and labor expenses. This product is recommended for use in molding applications because the film is made with very low stress which allows it to form easily without losing your registration.

### Features and Benefits:

- Excellent print registration
- Uniform texture
- Low gloss appearance
- Lower ink consumption
- OQ levels of cosmetics
- Available in gauges 5-20 mil

### Applications:

- Lighting and display
- Automotive dashboard
- Automotive interior
- Appliances
- Consumer electronics

More information and a technical datasheet for the product can be found on the [LEXAN 8A13E](#) product page. Tekra can convert 8A13E to either roll or sheet form. Please contact us today for free samples and/or a quote!
