Lexan™ HP92AFTY Anti-Fog Film

See clearly when it matters most with Lexan™ HP92AFTY Anti-Fog Film

Tekra now carries Lexan™ HP92AFTY Anti-Fog Film in up to 30mil options. This optically clear one-side coated anti-fog film is resilient against humidity and moisture, keeping your vision sharp. Unlike other competitive anti-fog film types that only offer thicknesses up to 14 mils, this anti-fog polycarbonate comes in a variety of gauges up to 30 mils, giving you the ability to meet application specifications that require thicker anti-fog films. The unmatched anti-fog property makes HP92AFTY a great option for face shields, goggles, PPE visors, and other applications that need superior optical clarity.

Features & specifications include:

- Limited reduction in visibility even under high humidity environments
- Anti-fog
- 7mil-30mil available; making it a viable option for applications requiring a thicker film
- Abrasion resistance
- Impact resistance
- Great optical clarity

With a fully staffed Research and Development department of chemists and engineers, Tekra has the ability to custom coat a specific construction to fit your needs. For more information on Tekra's coating capabilities, contact a Tekra representative or visit here.

Lexan™ HP92AFTY Anti-Fog Film is a reliable option for the face shield and visor market. To request a free sample, get a quote, or additional information, call us at 888-988-5546 or view the product page here.
