

FEATURED PRODUCT

3M™ Conformable Double Coated Tapes 93420, 93425, and 93430

3M™ Conformable Double Coated Tapes are uniquely designed with an energy absorbing core that make this tape more drop resistant and shock absorbing. Application ideas include lens bonding or electronic device bonding. The tapes are manufactured in three different adhesive thicknesses coated on both sides of a black, energy absorbing core. [8 mil \(93420\)](#), [10 mil \(93425\)](#), and [12 mil \(93430\)](#) total tape thicknesses are available options. Additional features of 3M™ Conformable Double Coated Tapes include:

- Excellent anti-lifting – at both room and elevated temperatures
- Great chemical resistance (to a variety of daily consumer chemicals)
- Versatile adhesion - strong bond for both HSE and LSE surfaces

Contact Tekra today at 1-800-448-3572 or at www.tekra.com to learn more about 3M™ Conformable Double Coated Tapes.
