3M™ VHB™ Tape GPH Series

Beat the heat with 3M™ VHB™ Tape GPH Series

For years, 3M™ VHB™ Tapes have been the perfect alternative to the use of traditional mechanical fasteners and liquid adhesives. Now, the new 3M™ VHB™ Tape GPH Series offers the same durable strength as traditional 3M™ VHB™ Tape, with higher temperature resistance.

The GPH Series products are ideal for challenging applications such as powder coat or liquid paint processes with a paint-bake cycle. Because 3M™ VHB™ Tape GPH Series can withstand temperatures up to 450°F short term, and up to 300°F long term, assembly can now take place prior to the painting process. In addition, the products can be considered in applications involving high operating temperature requirements such as glass panel cooktops.

Additional market ideas include:

- Signage
 - o LED signage
 - o Powder/Liquid painted exterior signage
- Metal Fabrication
 - o Stiffener bonding
 - o Panel to frame bonding
- Appliance
 - o Dryers
 - o Cooktops
 - o Oven hood
- Building and Construction
 - o Aluminum Architectural Panels

The 3M™ VHB™ Tape GPH Series is available in various thicknesses and width, ranging from 25 to 62 mils in thickness and 25" to 48" web widths.

Products include:

- 3M™ VHB™ GPH-060GF (25 mils)
- 3M™ VHB™ GPH-110GF (40 mils)
- 3M™ VHB™ GPH-160GF (60 mils)
