

FEATURED PRODUCT

ToneKote™ White Matte Polyester

ToneKote™ White Matte Polyester offers durability and superior print quality.

Tekra's ToneKote White Matte Polyester provides a proprietary primer to give your print projects a vibrant and colorful finish. The printable substrate is engineered to the specific requirements necessary for running through dry toner laser digital color presses. The polyester base film offers increased durability such as tear, water, and dirt resistance, compared to other synthetic materials for digital printing.

Tekra's ToneKote coating gives the material superior print adhesion on both sides, offering your prints a range of high definition colors and clear images with duplex print capabilities. Combine our ToneKote coating with polyesters durability and you have a trustworthy, toner-printable material that will provide you with crisp and popping images, great for numerous applications.

Recommended Applications:

- Printed labels and barcodes
- Graphic Signage
- POP Applications
- Durable maps and menus
- Durable Brochures

This material is available in 5, 7 and 10 mil thickness, and when stored in proper conditions, our white polyester is guaranteed to be usable one year after purchase.

Features:

- Inherently flexible
- Superb toner adhesion
- Ability to be heat stabilized, resulting in precise print registration
- Fantastic durability
- One year shelf life
