LEXAN™ HP01W Polycarbonate Film

[LEXAN™ HP01W](#) film is SABIC's latest product introduction, a new polished/matte weatherable polycarbonate film, which is a virtually glare-free solution and has a light transmission of 90% while maintaining excellent UV resistance. These performance capabilities, along with ease of processing, make HP01W film a good choice for outdoor graphic applications such as warning labels, outdoor menu boards, and gasoline pump graphics.

Features & specifications of [LEXAN™ HP01W](#) Polycarbonate Film include:

- Good chemical and abrasion resistance
- 7, 10, 15, 20, and 30 mil options
- Excellent UV resistance
- Ease of processing
- High light transmission
- Virtually glare-free film with clear and sharp graphics
- Polished/Matte finish

With a fully staffed Research & Development department of chemists and engineers, Tekra has the ability to custom coat a specific construction to fit your needs. For more information on Tekra's coating capabilities, contact a Tekra representative or visit our website.

When looking for UV resistance, chemical and abrasion resistance, and a polished/matte finish, try LEXAN™ HP01W. To obtain a sample, get a quote, or additional information, call us at 888-448-3572..
