Solventum 1509 Medical Tape

Tekra is a Converter of Solventum medical adhesives. As a complement to our films, our adhesive options offer the benefits of faster assembly time, design flexibility, immediate handling strength, dissimilar material bonding, clean aesthetics, and reduced product bulk. With a wide range of options, Tekra is your full-service provider.

What is Solventum 1509 Medical Tape?

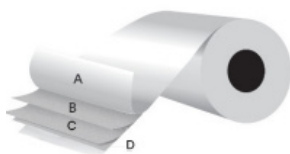

1509 is a double-sided medical tape that features a 3-mil transparent polyethylene film, coated on both sides with tackified acrylic adhesive. It offers strong adhesion, fluid resistance, and a heavy liner for easy handling and processing. This tape is ideal for surgical drapes.

Features:

- Non-sensitizing per ISO: 10993-10
- EtO & irradiation sterilization compatible
- Clear film
- Easy to apply
- Good for medium-term wear on skin
- Tackified acrylic adhesive
- Fluid resistance
- Good processability

Applications:

- Surgical drapes

Composition: Tape is typically ~4.9 mils [~0.12 mm] thick without release liner.

A-Paper Liner		80 lbs. Bleached Kraft Paper, DC Si Rel. (4.5 mils/0.11 mm)
B-Acr Adhesive		Tackified Acrylic-based Pressure Sensitive Adhesive
C-LDPE Carrier		3 mil (0.08 mm) Translucent Polyethylene Film Carrier
D-Acr Adhesive		Tackified Acrylic-based PSA (Faceside)
