August 2017

DuPont Dow Merger Update

New Berlin, WI - According to the Associated Press, DuPont and Dow have met all the regulatory requirements and will officially merge after the close of business on August 31, 2017. This is a complex "merger of equals" that will organize the various DuPont and Dow business units into three operating divisions with a stated goal of dividing into three separate and more focused companies over the next eighteen months. If you would like to review the companies' communications, please visit their website [here](#).

Tekra's supplier of polyester films, DuPont Teijin Films™ (DTF), will become part of the Materials Sciences division of the new DowDuPont Company. DTF has had two polyester manufacturing facilities in the United States for many years. Although long a part of a large joint venture, DTF has operated generally autonomously and we expect that structure to continue during the DuPont/Dow merger with little impact on our supply chain.

Further updates will be supplied as information becomes available.

Tekra, A Division of EIS, Inc. has provided plastic film and adhesive solutions to the printing industry for over 40 years and to the digital films industry for nearly 20 years. Tekra offers proprietary coating technologies, converting services, and, through special supplier relationships, a full line of plastic substrates. Tekra is the North American authorized distributor and exclusive distributor to the North American medical diagnostic market for DuPont Teijin Films™, the authorized distributor for the polycarbonate film products of SABIC Innovative Plastics in the United States and Canada, and an Authorized Master Converter 3M adhesives.
