## TEKRA ADDS MARNOT AG 100 GU POLYESTER TO ANTI-GLARE HARDCOAT LINE

New Berlin WI - Tekra is proud to announce the addition of Marnot AG 100 GU Polyester to the Marnot Anti-Glare product offering.

When it comes to touchscreen and control panel applications, glare and scratches can be an unsightly distraction. Marnot AG 100 GU Polyester resolves this distraction by providing the same anti-glare and hardcoat performance as the Marnot AG 90 GU Polyester. What sets this new film apart from the 90 GU product, is that the 100 GU product has a higher gloss level, which allows for clearer viewing and readability through screen devices.

Additional features include:

- Outstanding optical qualities
- Excellent scratch and abrasion resistance
- 3H pencil hardness rating
- High chemical resistance
- Ease of die cutting and embossing
- First surface printable

Marnot AG 100 GU Polyester is available in a 7 mil thickness at a web width of 49" and in 48" x 24" sheets. Tekra can also convert to any roll size or sheet needed. For more information and to request free samples, please contact Tekra at (800) 491-9578 or visit our website at [www.tekra.com](http://www.tekra.com).

*Tekra, A Division of EIS, Inc. has provided plastic film and adhesive solutions to the printing industry for over 40 years and to the digital films industry for over 15 years. Tekra offers proprietary coating technologies, converting services, and, through special supplier relationships, a full line of plastic substrates. Tekra is the North American authorized distributor and exclusive distributor to the North American medical diagnostic market for DuPont Teijin Films™, the authorized distributor for the polycarbonate film products of SABIC Innovative Plastics in the United States and Canada, and an Authorized Converter and Distributor for 3M adhesives.*
