

Tekra Fundamentals – What Is Melinex® Film?

What Is Melinex® Film?

Melinex® film is a biaxial oriented specialty polyester film that belongs to the family of polyester brands produced by [DuPont Teijin Films™](#). This type of film has high levels of dimensional stability at both low and high temperatures, and is used in a variety of industrial applications, like packaging and printing. There are many different types of [Melinex® polyester film](#) available, depending on the requirements of your application. Tekra is also able to add [functional coatings](#) for scratch and chemical resistance.

Melinex® Film Properties

Tekra actively inventories a comprehensive product range of Melinex® polyester film types, including:

- Super Clear
- Slightly Hazy
- Hazy
- Translucent Matte
- Opaque White
- Heat Stabilized
