LEXAN™ 8010 is a polished/polished polycarbonate that has excellent clarity for applications that need to have a high gloss aesthetic appearance. This product is most often used for in-mold decoration (IMD) applications, but as seen below, because of its outstanding features, it can be used in many other applications as well.

Features:

- Excellent clarity
- High heat resistance
- Superior dimensional stability for graphic art applications
- High gloss surface finish
- Derived from one of the world's toughest polymers
- Available in 7 - 40 mil
- Masked two sides to prevent scratching
- Easy formability
- Improved gauge control

Applications:

- In-mold decorations
- Automotive interiors
- Appliances
- Consumer electronics

LEXAN™ 8010 can be converted at Tekra and supplied in either roll or sheet form. Call us today to receive a quote or free samples.
