

## Clear, Graphic & Optical Polycarbonate Films

8A13E offers lower ink consumption and precise print registration

### NEW LOW STRESS MATERIAL ALLOWS FOR EXCELLENT PRINT REGISTRATION WHEN MOLDING...

SABIC  
Innovative  
Plastics™

سابك  
sabic

SABIC has developed a high clarity film with features and benefits that will help save time and money throughout the production process. LEXAN™ 8A13E is a clear, graphic grade polycarbonate that has a polish/fine matte texture. The major advantage in using this film is it has lower ink consumption than its counterparts. The 8A13E requires less passes saving ink and labor expenses. This product is recommended for use in molding applications because the film is made with very low stress which allows it to form easily without losing your registration.

#### Features:

- Excellent print registration for molding applications
- Uniform texture across entire web
- Low gloss appearance
- Lower ink consumption
- OQ level of cosmetics
- Available in 5 - 20 mil

#### Applications:

- Lighting and display
- Automotive dashboard
- Automotive interior
- Appliances
- Overlays
- Consumer electronics

LEXAN™ 8A13E can be converted at Tekra and supplied in either roll or sheet form. Call us today to receive a quote or free samples!
