LEXAN™ 8A13F is a one side fine matte, one side polish transparent polycarbonate film. This material is the same material as the 8A13F; however, it meets the UL 94 flammability rating. This material can be thermoformed, embossed, die cut, hydroformed, or bent with ease. This film is specifically designed to eliminate pinholes in backlit applications.

Features:

- Excellent dimensional stability with a smoother surface
- High temperature resistance
- Mar resistance
- Can be printed using traditional solvent or water-based, UV or infrared drying inks
- Improved gauge control
- 50% reduction in texture variation
- Available in 8 - 20 mil

Applications:

- Lighting and display
- Automotive dashboard
- Automotive interior
- Appliances
- Overlays
- Consumer electronics

LEXAN™ 8A13FV can be converted at Tekra and supplied in either roll or sheet form. Call us today to receive a quote or free samples!
