LEXAN™ 8A35V is a one side velvet, one side polished transparent polycarbonate film. This is the same material as the 8A35 film with the added element that it is UL Rated. The film is most often used in applications that are multi-layered printed. The velvet texture adds an element of mar resistance to the film.

Features:

- High temperature resistance
- Excellent dimensional stability
- Good printability without pre-treatment
- Low gloss
- Can be screen printed using solvent, water based, UV or infrared inks
- Ease of processing for thermoforming, embossing, die-cutting, hydroforming, and bending

Applications:

- Overlays
- Floor graphics
- High performance labels
- In-mold decorations
- Used over LEDs

LEXAN™ 8A35V can be converted at Tekra and supplied in either roll or sheet form. Call us today to receive a quote or free samples.
