LEXAN™ 8A37 is a one side brushed, one side polished transparent polycarbonate film. The film can be screen printed using traditional solvent, based, water based, UV or infrared inks. The brushed metal appearance can be achieved by back printing, laminating, or spraying with metallic inks, adhesives, or paint.

Features:

- High temperature resistance
- Brushed 1st surface allows processors and OEMs alike to achieve a brushed metal appearance
- Good printability without pre-treatment

Applications:

- Overlays
- Floor graphics
- High performance labels
- In-mold decorations
- Used over LEDs

LEXAN™ 8A37 can be converted at Tekra and supplied in either roll or sheet form. Call us today to receive a quote or free samples.
