LEXAN™ 8B35V is a velvet/matte transparent polycarbonate that can be used in many applications. It's velvet/matte finish reduces the chance of the film scratching during converting and handling, as well as, while the material is in use at its end application. The material can be screen printed using traditional solvent or water based inks. 8B35 can also be printed on with UV or infrared drying inks.

Features:

- UL 94 flammability rating
- High temperature resistance
- Excellent dimensional stability
- Good printability without pre-treatment
- Velvet/matte texture offers mar resistance
- Offered 3, 5 & 10 mil
- Embossable
- Diecuttable
- Hydroformable

Applications:

- Overlays
- Floor graphics
- High performance labels
- In-mold decoration
- Can be used over LEDs for light diffusion

POLYCARBONATE
