

3M™ Low VOC Tapes with Acrylic Adhesive

Thin attachment automotive solutions

3M™ LOW VOC TAPES WITH ACRYLIC ADHESIVE HELP IMPROVE VEHICLE AIR QUALITY...

3M™ Low VOC Tapes with Acrylic Adhesive were designed by 3M to meet indoor air quality (VIAQ) standards and emission standards as set out by JAMA, The Japanese Automobile Manufacturers Association and VDA 278; a German Association of the Automotive Industry test method that measures VOC and FOG emissions. 3M™ Low VOC Scrim reinforced transfer tape 98010LVC and 3M™ Low VOC Double Coated Tissue Tape 99015LVC are ideal for the following automotive interior applications:

- Headliner components
- Seat heaters and sensors
- Nameplates and emblems
- Cup holder inserts
- Instrument panels and dash
- Interior door panels
- Armrests and center panels
- Decorative trim
- Electrical component

Products are available for immediate shipment in less than full pallet quantities from Tekra. Converting services are also available if needed. Call us today at 1-800-448-3572 or email us at orderscentral@tekra.com for more information.
