

Marnot Advanced™ LI Clear Polycarbonate

Leaves Iridescence Where It Should Be...

TEKRA'S MARNOT ADVANCED™ LI CLEAR POLYCARBONATE COMBATS IRIDESCENCE...

MARNOT
Advanced

Marnot Advanced™ LI Clear Polycarbonate virtually eliminates iridescence by using refractive index matching technology. This quality is very important in the appliance market space where vibrant colors such as appliance white, jet blacks, and crisp metallics are standards and this material leaves the final products with no “oily sheen”. Marnot Advanced™ LI Clear Polycarbonate offers superior chemical resistance to the toughest chemicals including MEK, acetone, sunscreen, and insect repellent with 25% DEET.

Features:

- Low to no iridescence
- Excellent abrasion resistance
- Outstanding embossing and die cutting
- First surface printability with clear, matte and texture UV cure inks
- Second surface printability with solvent & UV inks
- Available in 7, 10, 15, 20, and 30 mils

Applications:

- Appliance overlays
- Nameplates
- Membrane switches
- Faceplates
- Control panels
- Warning & safety labels
