

# Ovenable Polyester Packaging Films

Mylar® 851H for heat-sealable, printable, food packaging applications

## MYLAR® 851H IS A PRINTABLE, FOOD PACKAGING FILM, FEATURING A THICKER HEAT SEAL LAYER THAN 850H...

Mylar® 851H is a co-extruded, one-side thicker amorphous, ovenable, heat-sealable polyester film that heat seals to APET, CPET, PETG, PET, PVC, and various tray types with a lock down, permanent seal. Mylar® 851H has a thicker heat seal layer than 850H. It is designed to be used in metallized, print, and lamination applications and is suitable for contact with food. Common applications include overwrap and ovenable bakery products.
