

Ovenable Polyester Packaging Films

Mylar® OWF2 for heat-sealable, food packaging applications

MYLAR® OWF2 IS DESIGNED AS AN OVERWRAP FILM SUITABLE FOR FOOD CONTACT, FEATURING A THICKER HEAT SEAL LAYER THAN OWF...

DuPont Teijin Films

Mylar® OWF2 is a co-extruded, one-side amorphous, ovenable, heat-sealable polyester film that is designed for overwrap film in food packaging applications. Mylar® OWF2 heat seals to APET, CPET, PETG, PET, PVC, and various tray types with a lock down, permanent seal. Mylar® OWF2 has a thicker heat seal layer than OWF. Common applications include overwrap and ovenable bakery products.

Features

- Co-extruded
- One-side thicker amorphous
- Heat sealable
- Ovenable
- Thicker heat seal layer than OWF
- Suitable PET film for food contact
- Available in 60 gauge

Applications

- Base polyester designed to be used as an overwrap film
- Food contact
- Ovenable bakery products
