

ProTek® Fine Texture

Heat Stabilized Hardcoated Polyester

A FINE TEXTURE POLYESTER FILMS WITH
ALL THE HARDCOAT BENEFITS...

ProTek®

ProTek® Fine Texture Heat Stabilized Hardcoated Polyester film offers the slight surface roughness needed for specific applications while maintaining all the benefits of Tekra's traditional hardcoated polyesters.

Features:

- Allows the ability to first surface decorate beyond the first pass eliminating the need to do blind register printing
- First surface printability with clear, matte, and texture UV cure inks
- Second surface printability with solvent and UV inks
- Fine texture topography makes it easy to print the first surface lacquer
- Polyester film is thermally stabilized
- Excellent die cutting and embossing performance
- High chemical resistance to common household and industrial chemicals
- Excellent scratch and abrasion resistance
- Available in 5, 7, and 10 mils

Applications:

- Overlays
- Nameplates
- Membrane switches
- Control panels
- Durable labels
