

TECHNICAL DATA

H2OWO White Opaque Rigid Vinyl – Permanent Adhesive

Description:	H2OWO is a .002 highly opaque white rigid vinyl coated with a cold temperature adhesive is designed to produce high quality markings, labels, emblems or signs. This product has a metal barrier for added opacity
Construction:	2.0 mils rigid polyvinyl chloride 1.0 mils cold temperature adhesive 7.0 mils 90# polyethylene coated 2-sides liner
Minimum Application Temperature:	+ 50° F
Application Surface:	Flat
Service Temperature Range:	-50° F to 225° F
Adhesion:	60oz / inch, PSTC Method #1, modified for a 15 minute dwell time with 1 mil of adhesive
Water Resistance:	Excellent
Solvent Resistance:	When properly applied and edge sealed, good resistance to most petroleum solvents and aliphatic solvents
Chemical Resistance:	Resistant to mild acids, alkalines, and salt
Dimensional Stability:	Good
Storage Stability:	Two years at 73° F and 50% RH
Outdoor Durability:	Two years when properly processed and applied
